

## How to Find the Correct Points for Dogs on the [WRA Site](#) (as of 9/10/19)

The WRA site is still broken and even has some brand-new bugs since this document was created in 2017. We are working on correcting the issues. Once the site is fixed, we can merge the NAWRA data into it. To make sure we have the most accurate information, the Registrar keeps the [Whippet Point Records spreadsheet](#) (located on the [Reports page](#)) with all of the correct information for each dog and uploads it to the site, where it appears in various documents on the [Records page](#). If you have any questions about the accuracy of your dog's records, please contact the Registrar (contact info on [Officers page](#)).

### This handy chart spells it out what is wrong on the site (and also what is right).

## Using the Whippet Point Records Spreadsheet

To summarize, the [Whippet Point Records](#) spreadsheet is the best place to look to find correct points and titles for your whippet. The Registrar manually enters data into this spreadsheet and uploads it to the site regularly. The Whippet Point Records spreadsheet lives on the [Reports page](#) of the WRA site.

This is what it looks like. The date that it was last updated will always be in the title on the top of the page. The default sort is alphabetical by Call Name.
